July 7, 2020 9:00 AM

Commissioners of Brazoria Drainage District No. 4 convened in session July 7, 2020 with the following Commissioners present:

Jeffrey H. Brennan

Dan Keller

*Harrison Rogers

*via conference call

Others Attending:

See Attached List

Following the invocation and Pledge of Allegiance, the Board considered the following items:

II. PUBLIC COMMENTS:

Mr. Clarence J. Henderson resident at 2725 Shauntel St. – Expressed concern about Mary's Creek bank erosion near his house. Mr. Henderson would like the District to remedy the erosion.

III. APPROVAL OF MINUTES:

Regular Meeting – June 2, 2020

Motion: Commissioner Brennan; Second: Commissioner Keller; To approve the minutes as submitted. Motion carried unanimously.

Executive Session – June 18, 2020

Motion: Commissioner Brennan; Second: Commissioner Keller; To approve the minutes as submitted. Motion carried unanimously.

IV. APPROVAL OF CHECKS:

Expenses for July and August 2020

Motion: Commissioner Brennan; Second: Commissioner Keller; To approve the checks numbered 38507 – 38585. Motion carried unanimously.

V. NEW BUSINESS:

A. Discussion, Consideration & Possible Action – To accept an Order Adopting Records Control Schedule updating the District records management program.

Motion: Commissioner Brennan; Second: Commissioner Keller; To accept an Order Adopting Records Control Schedule updating the District records management program. Motion carried unanimously.

B. Discussion, Consideration & Possible Action – To determine classification of the District pertaining to Senate Bill 2 in regards to the Truth in Taxation provisions.

Motion: Commissioner Brennan; Second: Commissioner Keller; To declare BDD4 a "Developing District" thus falling under Texas Water Code 49.23603. Motion carried unanimously.

C. **Discussion, Consideration & Possible Action** – To amend the 2019-2020 annual budget.

Motion: Commissioner Brennan; Second: Commissioner Keller; To amend the 2019-2020 annual flood control budget in the amount of \$4.5M utilizing funds from reserve monies. Motion carried unanimously.

VI. VARIANCE REQUESTS:

- A. **Discussion, Consideration & Possible Action –** Development Plat of Segenhof BDD4 #20145 Variance Request Kristofer Schoeffler Immediately west of the intersection of Roy Rd. & Hickory Slough.
 - 1. <u>Variance Request:</u> Variance from District Rules, Regulations & Guidelines for the plat from the Development of Segenhof.

Commissioner Rogers recuses himself.

Motion to table: Commissioner Keller; Second: Commissioner Brennan;

Commissioner Keller: Aye; Commissioner Brennan: No. Motion to table failed.

Motion to approve 85' Drainage Easement width based on the recommendation of Jarrod Aden, P.E., Lentz Engineering, District Engineer. Commissioner Brennan; Second: No second. Motion failed.

Commissioner Brennan asked staff to continue to work with Mr. Schoeffler. Mr. Schoeffler requested this item to be added to the August 4th agenda.

- B. **Discussion, Consideration & Possible Action –** Clover Skies Lot 14 BDD4 #19177 Variance Request Antonius Widjokongko Lot 14 at Pearland Regional Airport near Cowart Creek.
 - 1. <u>Variance Request:</u> To develop Lot 14 of Clover Skies without any requirement to provide additional detention capacity.

2 of 6 (07-07-2020)

III.

Motion: Commissioner Brennan; Second: Commissioner Keller; To deny the variance for the development of Lot 14 in the Clover Skies subdivision without providing any additional detention capacity. Motion carried unanimously.

- C. **Discussion, Consideration & Possible Action –** LPGPC BDD4 #20144 Variance Request PRO-SURV On CR 132 just west of CR 128.
 - 1. <u>Variance Request:</u> To allow a temporary encroachment of a portion of an existing building within the drainage easement as defined by the standard District Consent to Encroach Agreement and authorize the Chairman to sign said agreement.

Motion: Commissioner Brennan; Second: Commissioner Rogers; To allow a temporary encroachment of a portion of an existing building within the drainage easement as defined by the standard District Consent to Encroach Agreement and authorize the Chairman to sign said agreement based on the recommendation of Jarrod Aden, P.E., Lentz Engineering, District Engineer. Motion carried unanimously.

- Discussion, Consideration & Possible Action Surface Water Treatment Plant
 (City of Pearland) BDD4 #19195 Variance Request Freese and Nichols, Inc.
 On Mustang Bayou near CR 48.
 - 1. <u>Variance Request:</u> To allow the outfall pipe to be 6" above the static water surface elevation instead of the required 12".

Motion: Commissioner Brennan; Second: Commissioner Rogers; To allow the outfall pipe to be 6" above the static water surface elevation instead of the required 12" based on the recommendation of Jarrod Aden, P.E., Lentz Engineering, District Engineer. Motion carried unanimously.

- E. **Discussion, Consideration & Possible Action** Charleston Ultimate Detention BDD4 #20149 Variance Request Odyssey Engineering Group North side of SH 6 on the western boundary of BDD4 (approving only portions within BDD4 jurisdiction).
 - 1. <u>Variance Request:</u> To allow a grass lined emergency overflow swale as opposed to the required concrete lined swale.

Motion: Commissioner Brennan; Second: Commissioner Rogers; To allow a grass lined emergency overflow swale as opposed to the required concrete lined swale with a 4:1 slope based on the recommendation of Jarrod Aden, P.E., Lentz Engineering, District Engineer. Commissioner Brenan & Commissioner Rogers: Aye; Commissioner Keller: No. Motion carried by majority.

F. **Discussion, Consideration & Possible Action** – Cmajdalka Estates – BDD4 #19183 – Variance Request – Blake Cmajdalka – 2644 Miller Ranch Rd.

3 of 6 (07-07-2020)

1. <u>Variance Request:</u> To allow a temporary encroachment of a fence within the drainage easement as defined by the standard District Consent to Encroach Agreement and authorize the Chairman to sign said agreement.

Motion: Commissioner Brennan; Second: Commissioner Keller; To allow a temporary encroachment of a fence within the drainage easement as defined by the standard District Consent to Encroach Agreement and authorize the Chairman to sign said agreement based on the recommendation of Jarrod Aden, P.E., Lentz Engineering, District Engineer. Motion carried unanimously.

- G. Discussion, Consideration & Possible Action Del Bello Lakes BDD4 #19203
 Variance Request LJA Engineering, Inc. Between future Manvel Pkwy. and SH 288; west of the American Canal.
 - 1. <u>Variance Request #1:</u> To allow the outfall pipe to be 6" above the static water surface elevation instead of the required 12".

Motion: Commissioner Brennan; Second: Commissioner Keller; To allow the outfall pipe to be 6" above the static water surface elevation instead of the required 12" based on the recommendation of Jarrod Aden, P.E., Lentz Engineering, District Engineer. Motion carried unanimously.

2. <u>Variance Request #2:</u> To allow a grass lined emergency overflow swale as opposed to the required concrete lined swale.

Motion: Commissioner Brennan; Second: Commissioner Rogers; To allow a grass lined emergency overflow swale as opposed to the required concrete lined swale based on the recommendation of Jarrod Aden, P.E., Lentz Engineering, District Engineer. Commissioner Brennan & Commissioner Rogers: Aye; Commissioner Keller: No. Motion carried by majority.

3. <u>Variance Request #3:</u> The reduction of maintenance berm width from the required 30' to 20'.

Motion: Commissioner Brennan; Second: Commissioner Rogers; The reduction of maintenance berm width on Del Bello detention ponds from the required 30' to 20' based on the recommendation of Jarrod Aden, P.E., Lentz Engineering, District Engineer. Commissioner Brennan & Commissioner Rogers: Aye; Commissioner Keller: No. Motion carried by majority.

- H. **Discussion, Consideration & Possible Action** CR 190 Bridge Replacement (Brazoria County) Variance Request IEA, Inc. On CR 190 near intersection of CR 383.
 - 1. <u>Variance Request:</u> A reduction of the low chord requirement relative to the 100-year water surface elevation.

4 of 6 (07-07-2020)

Motion: Commissioner Brennan; Second: Commissioner Rogers; To open for discussion the variance request submitted by IEA, Inc. for the CR 190 Bridge Replacement. Amended motion: Commissioner Brenan; Second: Commissioner Keller; To table the discussion for the CR 190 Bridge Replacement variance request until a meeting with Brazoria County to further discuss this project based on the recommendation of Jarrod Aden, P.E., Lentz Engineering, District Engineer. Motion carried unanimously.

- I. Discussion, Consideration & Possible Action CR 58 from Savannah Development to CR 48 (Brazoria County) BDD4 #19142 Variance Request McDonough Engineering Corporation CR 58 from the Savannah Development to CR 48.
 - 1. <u>Variance Request:</u> To allow a 3:1 pond side slope as opposed to the required 4:1

Motion: Commissioner Brennan; Second: Commissioner Rogers; To allow a 3:1 pond side slope as opposed to the required 4:1 based on the recommendation of Jarrod Aden, P.E., Lentz Engineering, District Engineer. Motion carried unanimously.

VII. PLATS & PLAN:

- A. **Discussion, Consideration & Possible Action** Cullen RV Resort BDD4 #19105 Final Drainage Plan N Architectural Group Southwest corner of Bailey Rd. & Joe Dr.
- B. **Discussion, Consideration & Possible Action** Commercial Building BDD4 #20159 Final Drainage Plan AL&B Engineering Services, LLC 8194 CR 128.
- C. **Discussion, Consideration & Possible Action** LPGPC BDD4 #20144 Final Plat PRO-SURV On CR 132 just west of CR 128.
- D. Discussion, Consideration & Possible Action Shops at Sedona BDD4 #19199
 Final Drainage Plan Heights Engineering, LLC North West intersection of CR 101 & CR 94.
- E. **Discussion, Consideration & Possible Action** Manvel Town Center Wastewater Treatment Plant Phase 1 BDD4 #18141 Final Drainage Plans BGE, Inc. North West of the intersection of SH 288 & SH 6 in the future Manvel Town Center development.
- F. **Discussion, Consideration & Possible Action** Charleston Ultimate Detention BDD4 #20149 Final Drainage Plans Odyssey Engineering Group North side of SH 6 on the western boundary of BDD4 (approving only portions within BDD4 jurisdiction).

5 of 6 (07-07-2020)

- G. **Discussion, Consideration & Possible Action** Pomona Wastewater Treatment Plant Phase 3 BDD4 #19201 Final Drainage Plan LJA Engineering, Inc. Located near Croix Parkway bridge on the south side of Mustang Bayou within the Pomona development.
- H. **Discussion, Consideration & Possible Action** Surface Water Treatment Plant (City of Pearland) BDD4 #19195 Final Drainage Plan Freese and Nichols, Inc. On Mustang Bayou near CR 48.
- I. Discussion, Consideration & Possible Action Manvel Town Center Water Plant
 BDD4 #18153 Final Drainage Plan BGE, Inc. At the northwest intersection of SH 288 & SH 6 in future Manvel Town Center.
- J. Discussion, Consideration & Possible Action Moore Estates BDD4 #20168
 Final Plat Survey 1, Inc. 7946 Moore Rd.; west of the railroad, north of CR 100.

Motion: Commissioner Brennan; Second: Commissioner Keller; To approve the plats and plans as submitted based on the recommendation of Jarrod Aden, P.E., Lentz Engineering, District Engineer. Motion carried unanimously.

VIII. ADJOURN:

No further business, the meeting adjourned at 10:46 A.M., July 7, 2020.

Jeffrey H. Brennan, Chairman	
Dan Keller, Secretary	
Harrison Rogers

BRAZORIA COUNTY APPRAISAL DISTRICT

MEMBERS OF THE BOARD Ro'Vin Garrett Tommy King Gail Robinson

Glenn Salyer George Sandars Susan Spoor CHIEF APPRAISER
Cheryl Evans
500 North Chenango
Angleton, Texas 77515
979-849-7792
Fax 979-849-7984

A message from the Chief Appraiser of Brazoria County Appraisal District:

As all of you know this is a difficult time in our county, in our state and country and the world. As leaders, we are all being faced daily with challenges to maintain acceptable standards for those we serve.

Part of the responsibility put on me, as chief appraiser, is to deliver to you an accurate certified tax roll so that you can prepare for the upcoming year with your utmost due diligence.

Unfortunately, for the first time in my career – I am unable to do so.

Limitations brought on by Covid 19 hampered the timely procession of appraisal review board hearings and therefore the Brazoria County Appraisal Review Board was unable to approve the district's records under Tax Code Section 41.12.

However, as if our legislature had insight into what was about to happen, they added a caveat under Section 26.01 (SB2-subsection a-1) to provide that if by July 20th the ARB has not approved the appraisal records for the district, the chief appraiser shall prepare and certify for each taxing unit an estimate of the taxable value of property in that taxing unit.

I want to assure each of you that the attached estimate is viable and very close to being part of a completed certified roll.

Your patience and understanding is appreciated and if you have any questions or concerns, please feel free to contact me.

Sincerely,

Chief Appraiser

Brazoria County Appraisal District

BRAZORIA COUNTY APPRAISAL DISTRICT

STATE OF TEXAS COUNTY OF BRAZORIA

2020 CERTIFIED ESTIMATE OF TAXABLE VALUE

BRAZORIA COUNTY DRAINAGE DISTRICT #4

(Pearland)

In compliance with Section 26.01(a-1) of the State Property Tax Laws, "submission of rolls to taxing units," notice is hereby given to-wit:

Brazoria Drainage District No. 4

A Political Subdivision of the State of Texas

August 4, 2020

Board of Commissioners Brazoria Drainage District No. 4 4813 W Broadway St. Pearland, Texas 77581

Re: Bid #20609 - Concrete Paving Services Annual Contract

Dear Commissioners,

A bid for the above-referenced project was received at a public bid opening at the District office on July 23, 2020. One (1) sealed bid was opened and read aloud at 10:00 a.m.

The results of the bid opening are reported on the attached bid tabulation. No bid or math errors were found during this tabulation.

We recommend to offer award of the Concrete Paving Services Annual Contract to JBRI Construction. The District has prior experience with JBRI Construction and is familiar with their qualifications.

V.B.

Thank you,

Leigh Blumer

Leigh Blumer Assistant Superintendent

Re: Bid #20610 – General Contract Services Annual Contract

Dear Commissioners,

A bid for the above-referenced project was received at a public bid opening at the District office on July 23, 2020. Two (2) sealed bids were opened and read aloud at 10:30 a.m.

The results of the bid opening are reported on the attached bid tabulation. No bid or math errors were found during this tabulation.

We recommend to offer the General Contract Services Annual Contract to JBRI Construction. The District has prior experience with this company and is familiar with their qualifications.

V.C.

Thank you,

Leigh Blumer

Leigh Blumer Assistant Superintendent

Brazoria Drainage District No. 4

A Political Subdivision of the State of Texas

August 4, 2020

Board of Commissioners Brazoria Drainage District No. 4 4813 W Broadway St. Pearland, Texas 77581

Re: Bid #20612 - Reinforced Concrete Storm Sewer Box Culverts Annual Contract

Dear Commissioners,

A bid for the above-referenced project was received at a public bid opening at the District office on July 23, 2020. One (1) sealed bid was opened and read aloud at 11:30 a.m.

The results of the bid opening are reported on the attached bid tabulation. No bid or math errors were found during this tabulation.

We recommend to offer award of the Reinforced Concrete Storm Sewer Box Culverts Annual Contract to Rinker Materials. The District has prior experiences with this company and is familiar with their qualifications.

V.E.

Thank you,

Leigh Blumer

Leigh Blumer Assistant Superintendent

RE: Segenhof

Variance Request BDD 4 Ref ID#: 20145

LE-20004

We are in receipt of the attached request for variance from Kristofer Schoeffler.

The variance cites the District's requirement for the dedication of a 170 foot total width drainage easement for Hickory Slough. Due to the Slough's location along the West side of Roy Road, the Applicant would have to dedicate the 170 foot drainage easement in it's entirety.

The Applicant is seeking approval from the Board reducing the requirement to a 30 foot drainage easement as measured from the centerline of the creek and an additional (adjacent) 20 foot access easement.

The Applicant states his hardship(s) in detail in the attached request for variance.

District staff and I have researched this issue, visited the site, and met with Mr. Schoeffler in person.

Based upon our findings and discussions with District personnel, we would support a Board decision to reduce the required drainage easement width from 170 feet in total width to a 85 foot drainage easement as measured from the existing centerline of Hickory Slough.

Jarrod D. Aden, P.E. President

cc: Mr. John Genaro

Mr. Leigh Blumer Ms. Sarah Roeber Mr. Clint Goebel Mr. Dillon Wilburn Mr. Tom Daniel

VI.A. 35

Jarrod -

Thank you again for spending time with me on Tuesday. I appreciate the questions you answered and the offer that was made by DD4 staff with your support.

I have formulated my variance request and it is as follows:

Whereas, I am being required to re-plat property that has been a homestead of my family since 1976 because I wish to replace the existing home with a new home; and,

Whereas, the City of Pearland has declined to recognize my existing plat because we were annexed into the city limits in 1997 and the existing plat predates that annexation; and,

Whereas, I have been informed by DD4 staff that the current statutes require that I cede a 170' easement along Hickory Slough to DD4 that should be in addition to the 40' ROW dedication required by the City of Pearland; and,

Whereas, DD4 staff has offered to support a reduction of the easement requirement to be 85' total width measured from the center of the stream; and,

Whereas, the current bed of Hickory Slough lies completely upon my property and extends west from the center of the stream approximately 30' at its widest; and,

Whereas, to my knowledge, DD4 does not have contiguous easement and cannot likely gain contiguous easement to the south of my property along the same waterway; and,

Whereas, my neighbors, the Post family, were not required to dedicate easement to DD4 for the same purpose despite the same statutes being in effect and thus now have a new home within the 85' proposed easement; and,

Whereas, permanent structures that are still in use on my property are located within the 85' proposed easement and there is no established time-frame to remove those structures; and,

Whereas, DD4 has plans and is actively pursuing funding to divert water away from the portion of Hickory Slough that currently lies upon my property; and,

Whereas, Hickory Slough has remained unchanged for decades and has functioned as such; and,

Whereas, due to encumbrances placed upon my property by the City of Pearland and DD4, more than 30% of my acreage will be unsuitable for improvement and use as I see fit; and,

Whereas, this amounts to an unreasonable and unfair requirement to be placed upon a single home-owner, especially given the heirloom status of the property in question;

VI.A. 36

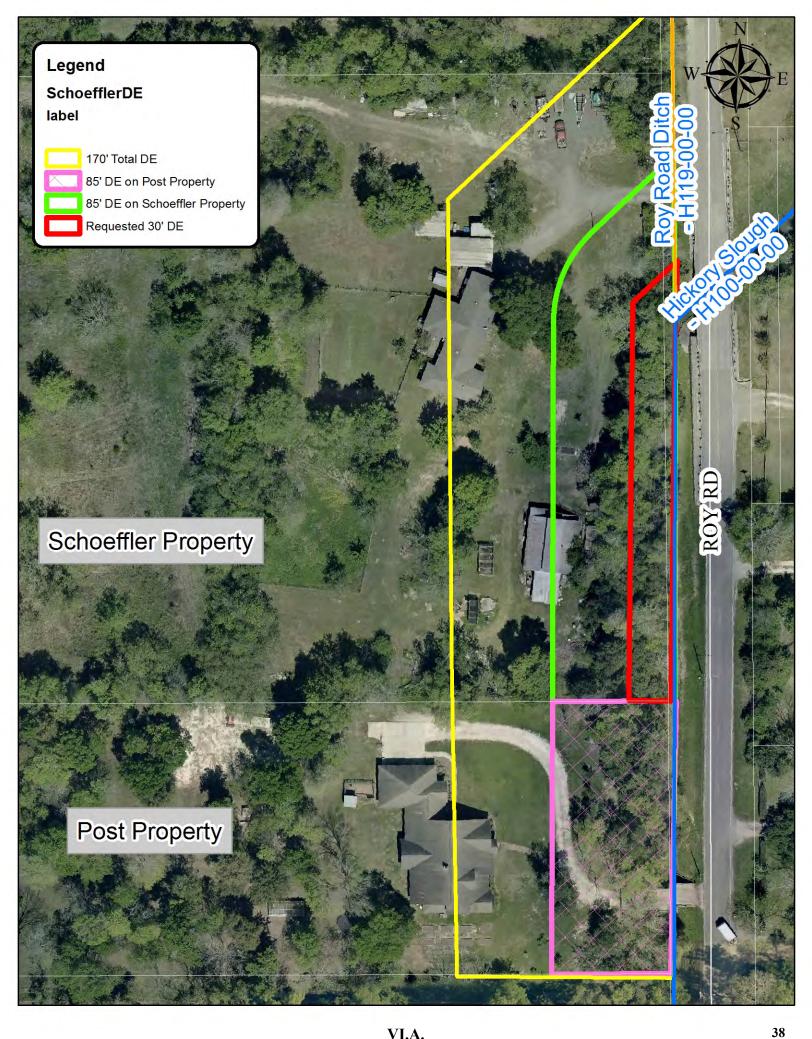

Therefore, I request that DD4 accept an easement of 30' measured from the center of the stream and an additional 20' access easement onto the property for bank maintenance.

Please let me know if this will suffice or if you have any questions. Thank you again.

Kris Schoeffler

Deus caritas est.

RE: Rodeo Palms The Lakes Section 3

Variance Request BDD 4 Ref ID#: 20172 LE-20004

Dear Commissioners:

We are in receipt of the attached request for variance from Jared Bowlin of EHRA.

The variance cites the District's requirement for a 30' maintenance berm for ponds that are adjacent to a road right of way. The applicant is requesting a reduction from 30 feet to 10 feet. In their request, the applicant cites hardship of the basis that their overall development plan was approved by former District personnel.

The following additional information may be useful in determining whether or not this request should be granted:

- 1. There is less than 100 feet of frontage against the right of way.
- 2. The vast majority of the detention will have wider berms.
- 3. This proposal is consistent with what has been previously constructed within Rodeo Palms. We are not aware of any maintenance issues with these existing basins.
- 4. The District will never own or maintain these facilities.

Based upon these findings and the applicant's hardship, we would support a Board decision to grant this variance request.

Sincerely,

Lentz Engineering, LLC

Jarrod D. Aden, P.E.

Brazoria Drainage District No. 4

A Political Subdivision of the State of Texas

Variance Request Form

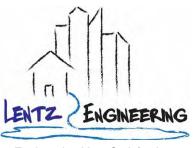

Pecuniary hardship to the developer, standing alone, shall not be deemed to constitute undue hardship. The variance shall not have the effect of nullifying the intent and purpose of the Rules, Regulations & Guidelines.

Applicant Name: Jared Bowlin		
Applicant Phone Number: 713-784-4500		
Project Name: Rodeo Palms, The Lakes Section 3		
Project Number: 20172		
The specific rule or requirement that the Applicant wants to deviate from:		
When a detention facility is constructed adjacent to a street right-of-way or DISTRICT channel, a minimum 30 foot maintenance berm is required. This does not include the required channel maintenance berm of the DISTRICT channel or the distance from the street right-of-way line to the curb. Callout / show these locations on the plans. [Appendix A.3.4.1.c, page 61]		
The hardship created by the rule or requirement:		
The current land plan for Rodeo Palms, The Lakes Section 3 has been established for many years and it is designed to effectively coincide with existing sections, detention facilities, & utilities surrounding it. Multiple detention ponds, maintained by BCMUD 29, do not have the 30' minimum requirement, per the Master Plan.		
The deviation that is requested:		
A maintenance berm adjacent to a street right of way to 10'. The detention facility will be owned and maintained by BCMUD 29. Several existing maintenance berms withing BCMUD 29 are less than 30' wide.

RE: C-Store – JT Plaza III

Variance Request

BDD 4 Ref ID#: 19198

LE-20004

Dear Commissioners:

We are in receipt of the attached request for variance from Hasmukh Doshi of Doshi Engineering & Surveying.

The variance cites the District's requirement for a 15' maintenance berm for ponds that are between 2 and 5 feet in depth. The applicant is requesting a reduction from 15 feet to 10 feet. In their request, the applicant cites hardship of the basis that their space is severely limited due to shallow adjacent ditches and the requirements for on site septic system.

The following additional information may be useful in determining whether or not this request should be granted:

- 1. The nominal depth of this pond is 2 feet. If the pond were just slightly shallower, the District's criteria would allow 10 foot berms.
- 2. A considerable portion of the 10 foot berms are adjacent to paving areas which essentially serve as an extension of useable maintenance area.
- 3. The Applicant has added a concrete ramp with 8:1 slope which would allow equipment to access the pond bottom and conduct maintenance from within the basin.
- 4. The District will never own or maintain this pond.

42

Based upon these findings and the applicant's hardship, we would support a Board decision to grant this variance request.

Sincerely,

Lentz Engineering, LLC

RE: C-Store – JT Plaza III

Variance Request

BDD 4 Ref ID#: 19198

LE-20004

Dear Commissioners:

We are in receipt of the attached request for variance from Hasmukh Doshi of Doshi Engineering & Surveying.

The variance cites the District's requirement for 4:1 side slopes on detention ponds. The applicant is requesting permission to use vertical walls. In their request, the applicant cites hardship of the basis that their space is severely limited due to shallow adjacent ditches and the requirements for on site septic system.

The following additional information may be useful in determining whether or not this request should be granted:

- 1. The Applicant has added a concrete ramp with 8:1 slope which would allow equipment to access the pond bottom and conduct maintenance from within the basin.
- 2. The District will never own or maintain this pond.

Based upon these findings and the applicant's hardship, we would support a Board decision to grant this variance request.

Sincerely,

Lentz Engineering, LLC

Jarrod D. Aden, P.E.

President

cc: Mr. John Genaro

Mr. Leigh Blumer

Ms. Sarah Roeber

Mr. Tom Daniel

Brazoria Drainage District No. 4

A Political Subdivision of the State of Texas

Variance Request Form

Pecuniary hardship to the developer, standing alone, shall not be deemed to constitute undue hardship. The variance shall not have the effect of nullifying the intent and purpose of the Rules, Regulations & Guidelines.

Applicant Name: Hasmuk	h H. Doshi P.E., RPLS, DOSHI ENGINEERING & SURVEYING COM	
Applicant Phone Number:	832-868-9906	
Project Name: C-Store Drainage Plan		
Project Number: BDD4 #1	9198	

The specific rule or requirement that the Applicant wants to deviate from:

Detention pond side slopes shall be 4:1 or flatter. [Appendix A.3.4.1.a, page 61]

The hardship created by the rule or requirement:

To meet the detention pond slope requirements, additional area is required on all sides of the pond. This option is not feasible for this project because of inadequate open land. In the absence of public sanitary sewer system at the property, we are required to provide an on-site septic/drip system, which occupies a significant portion of the available open land.

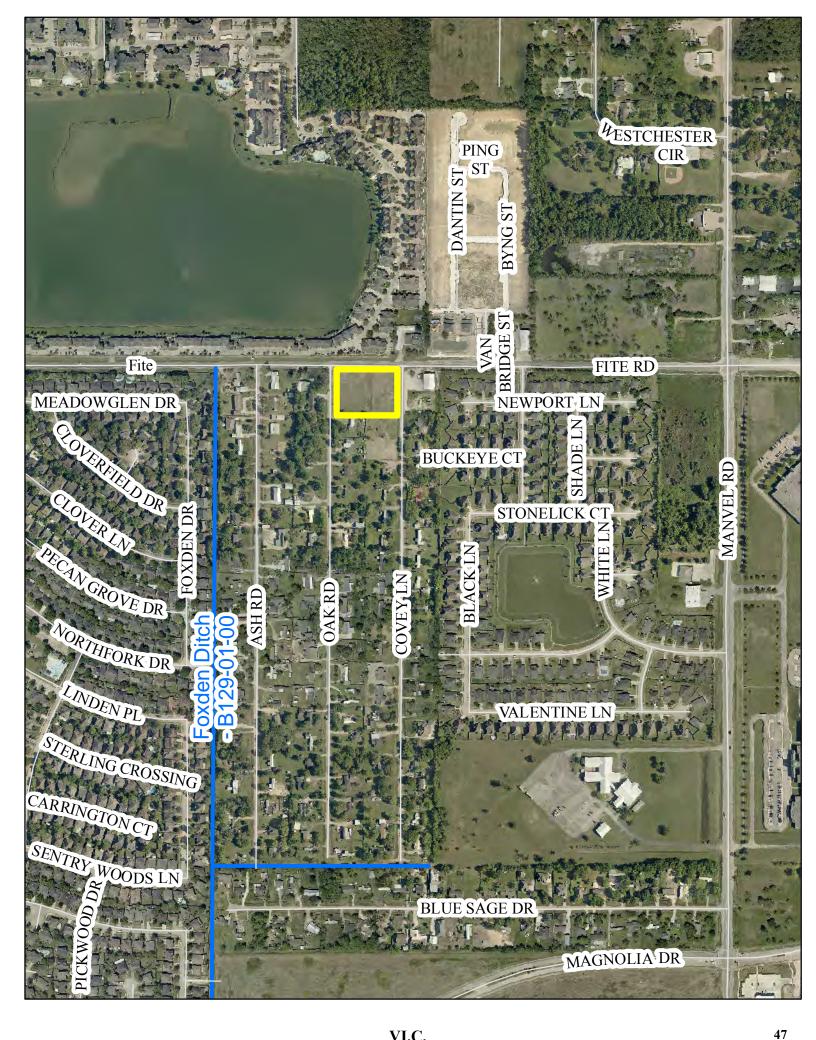

The existing roadside drainage ditches are not deep enough to design a deeper detention pond. The current depth of the detention pond has been designed based on this requirement.

Therefore, the 4:1 side slope requirement with the current detention pond depth, will provide less detention capacity than required (for a 100-year storm event). With the proposed vertical wall, the design will not only provide the required detention capacity but also will allow the construction of the maintenance berm around the pond, and the outfall for the extreme event.

In addition, our revised plan shows that concrete lined overflow swale has been extended into the pond at 8 to 1 slope to provide safe access to the equipment for pond maintenance activities.

The deviation that is requested:

Allow design and construction of a vertical wall as shown in the Final Drainage Plan as an alternative to the detention pond with side slopes of 4:1 or greater.

RE: Harvest Acres RV Park

Variance Request

BDD 4 Ref ID#: 20177

LE-20004

Dear Commissioners:

We are in receipt of the attached request for variance from Kyle Urbanec.

The variance cites the District's requirement for the outfall to be placed one foot above the static water elevation and the flowline of the existing ditch. The applicant is requesting a reduction of the 12 inch requirement to 6 inches. In their request, the applicant cites hardship of the basis that they will be unable to achieve the required detention volume due to a shallow roadside ditch.

The following additional information may be useful in determining whether or not this request should be granted:

1. The District will not own or maintain this pond.

Based upon these findings and the applicant's hardship, we would support a Board decision to grant this variance request.

Sincerely,

Lentz Engineering, LLC

VII.J. 80

EXECUTIVE SUMMARY

The Pomona development is an approximately 1000-acre planned development within the Mustang Bayou (BDD4 Unit D100-00-00) Watershed in Brazoria County, Texas. It is planned to consist of approximately 1000-acres of residential and commercial mixed-use development. The purpose of this report is to summarize the analysis of the three (3) proposed bridges in the Pomona development that will cross Mustang Bayou (BDD4 Unit D100-00-00). The upstream bridge will be at the future Pomona Parkway extension, the next downstream bridge will be at the future Kirby Lane extension, and the furthest downstream bridge, which is currently unnamed, is between the Kirby Lane bridge and CR 84.

The new bridges over Pomona Parkway and Kirby Lane will be two (2) separate structures with 27 feet of separation between the two (2) decks. Due to the very short distance between the structures, the two (2) separate bridge structures will be modeled as a single (1) structure. For the Pomona Parkway and Kirby Lane structures, the bridge will have three (3) spans that are approximately 240 feet in overall length with 3X3-foot piers. The total bridge width will be about 100 feet. The proposed bridge low chord elevation for Pomona Parkway will be 67.02 feet (NGVD-29) based on the proposed plans and the low chord for Kirby Lane will be 66.8 feet (NGVD-29).

The collector road bridge will be one (1) structure with only one deck. The bridge will have three (3) spans that are approximately 240 feet in overall length with 3X3-foot piers. The total bridge width will be approximately 60 feet. The proposed bridge low chord for the collector road will be 66.08 feet (NGVD-29).

Overall, with the planned detention and constructed channel modifications, the proposed bridges can occur without any adverse impacts on Mustang Bayou (BDD4 Unit D100-00-00) or to adjacent properties. There are no increases in water surface elevation on Mustang Bayou (BDD4 Unit D100-00-00) for flood frequencies up to and including the 100-year storm events.

VII.J.

1.0 INTRODUCTION

1.1. Project Description and Location

This report presents a drainage analysis and drainage plan for the proposed three (3) bridges for the Pomona development in Brazoria County, Texas. This project will cross a FEMA studied stream, Mustang Bayou (BDD4 Unit D100-00-00), so the project is located partially within in the floodway limits of Mustang Bayou (BDD4 Unit D100-00-00), as shown on FIRM panel # 48039C0020H (Effective date June 5, 1989). No fill will be placed within floodway. The upstream bridge will be at the future Pomona Parkway extension, the next downstream bridge will be at the future Kirby Lane extension, and the furthest downstream bridge, which is currently unnamed, is between the Kirby Lane bridge and CR 84. A project vicinity map and bridge layout are shown on **Exhibit 1** and **Exhibit 2** respectively. A copy of the FEMA FIRM is included in **Exhibit 3**.

1.2. Scope of Work

The scope of work consists of providing drainage analysis and bridge layouts for the proposed Pomona Parkway, Kirby lane and collector road over Mustang Bayou (BDD4 Unit D100-00-00). This drainage report will document the hydraulics of existing channel conditions and the proposed bridge structures. A separate scour analysis report will be submitted.

1.3. Datum Information

As stated in the MDP, the effective Mustang Bayou (BDD4 Unit D100-00-00) Flood Insurance Study (FIS) computer models and FIRMs obtained from FEMA use National Geodetic Vertical Datum of 1929 (NGVD-29). The benchmarks for the survey were based on the 1978 Adjustment. Overbank information is based on LiDAR obtained for the Coastal Study by the Texas Natural Resources Information System (TNRIS). This LiDAR was obtained in flights performed in 2005 and is based on the North American Vertical Datum of 1988 (NAVD88). The following equation is used to adjust the elevations between the two datums:

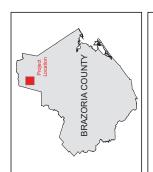

NGVD-29, 1978 Adjustment = NAVD 88 + 1.55 feet

Survey of the control points used for the LiDAR in the vicinity of the project was performed to determine the adjustment required between the NAVD88 LiDAR and the NGVD-29 (1978 adjustment). All elevations used in this report are referenced to the NGVD-29 datum (1978 adjustment) unless stated otherwise.

1.4. Referenced documents and Construction Plans

RE: Caldwell Tract Addendum 1

Drainage Impact Analysis (1)

BDD 4 Ref ID: 19121

LE-19004

Dear Commissioners:

On behalf of Brazoria Drainage District No. 4, we have reviewed the first submittal of the Drainage Impact Report as submitted for the above-mentioned project and find it to be in conformance with the Rules, Regulations, and Guidelines of Brazoria Drainage District # 4.

The purpose of this addendum is to show that a school can be built without an adverse impact. The School District needs to start construction as soon as possible to meet their project schedule and could not wait until the stormwater pump station is completely constructed.

If you have any questions or require any further information, please do not hesitate to call.

Sincerely,

Lentz Engineering, LLC

Jarrod D. Aden, P.E.

President

cc: Mr. John Genaro

Mr. Leigh Blumer

Ms. Kimberley Woodall

Ms. Sarah Roeber

Mr. Matt Hanks, P.E.

Mr. Bob Bardin, P.E.

VII.L.

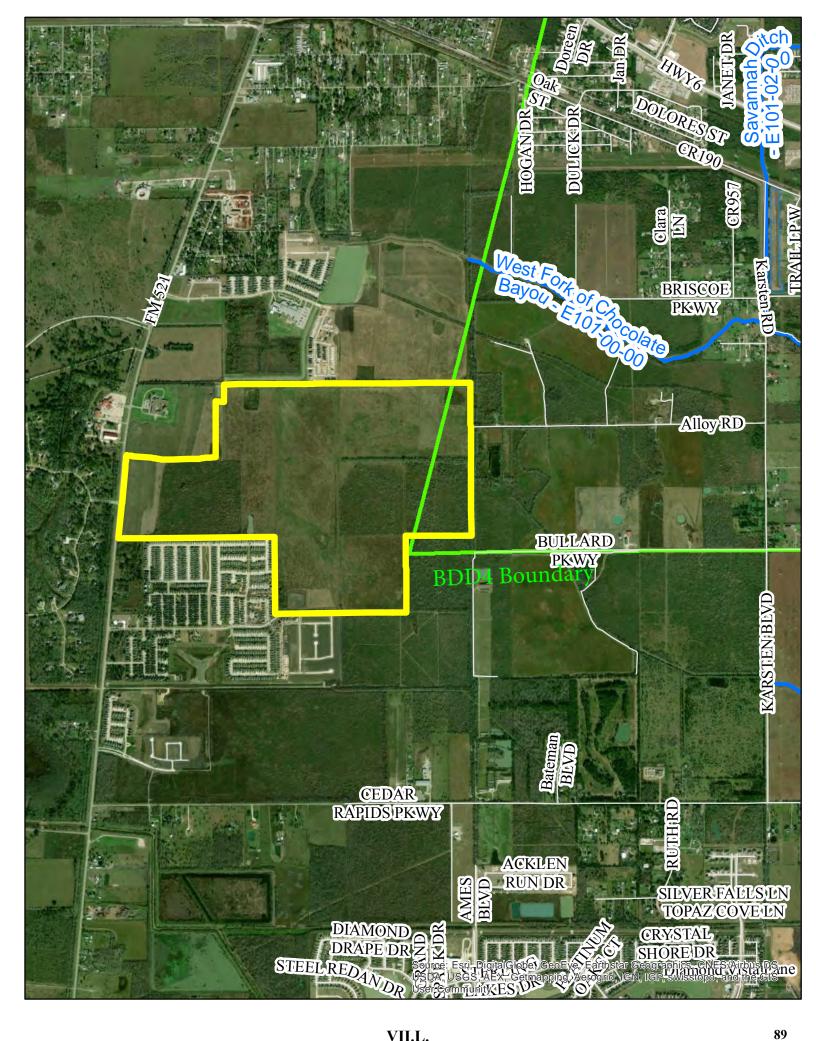

Figure 1 Caldwell Tract Analysis Area

To demonstrate no adverse impacts, the existing flows leaving the tract will not be exceeded. The allowable discharge is based on the capacity of the outfall channels or existing conditions runoff leaving the tract, whichever is less. The downstream limits of the analysis are located at the east boundary of the tract. The Chocolate Bayou Watershed was not studied in detail downstream of the tract since flows leaving the site will not increase and the hydraulic characteristics of Chocolate Bayou will not be altered.

Due to the shallow depth, flat topography, and limited outfall capacity, pumped detention is proposed for the ultimate development of the Caldwell Tract. The interim condition will not use pumped outfall; the drainage will rely entirely on gravity outfall. In order to drain the interim conditions development without exceeding the allowable discharge and meet the minimum freeboard requirements, minor revisions will be needed on a temporary basis.

In the ultimate conditions, gravity discharge is provided by 2-2x3 reinforced concrete box culverts with a flowline elevation of 54.8' (NAVD 88, 2001 adj). For the interim conditions, additional depth will be needed to provide more volume in the detention system for mitigating impacts. Therefore, a temporary outfall is proposed that will replace the ultimate conditions outfall. The temporary outfall will consist of 2-30" Corrugated Metal Pipes (CMP) with a flowline of 53.8'. The decreased flowline elevation will result in more detention volume needed to restrict the discharge to the allowable release rate.

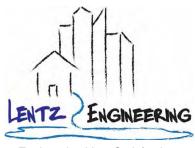

Since the temporary CMP's, combined with the 2-3x2 RCB's, will result in a combined discharge in excess of the allowable discharge, it is proposed that the RCB's not be used in Interim conditions. The combination of storage and restricted discharge will result in drain times in excess of 48 hours. Therefore, a "back to back" storm simulation (100-year 48 hour storm event) was used to analyze the interim conditions similarly to the approved ultimate conditions DIA.
